**FOR THE
SELF STORAGE
INDUSTRY**

- > Final color selection should be made from actual color chips.
- > For the most current information, visit ctcstorage.com
- > A 40-year limited paint warranty is available for all colors upon written request. Please inquire. (*Outside the continental United States, please inquire.*)
- > Solar Reflectivity (SR) Solar reflectivity or reflectance is the measure of a materials ability to reflect solar energy or sunlight from its surface. SR values are numbered 0 to 1.0. A value of 0 indicates that the surface absorbs all solar energy and a value of 1.0 indicates total reflectance.
- > Solar Reflectance Index (SRI): The SRI is used to determine compliance with LEED requirements and is calculated according to ASTM E 1980 using values for reflectance and emissivity. To meet LEED requirements, a roofing material must have an SRI of 29 or greater for steep slope roofing and an SRI value of 78 or higher for low slope roofing. For more information, visit usgbc.org.
